

eBike CHARGING STATION

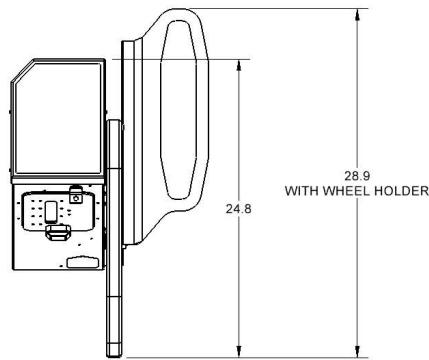

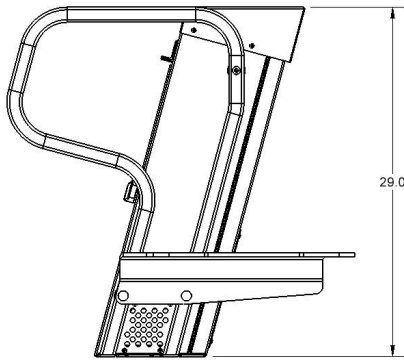

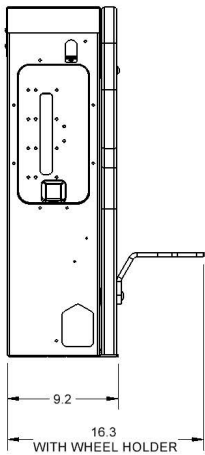

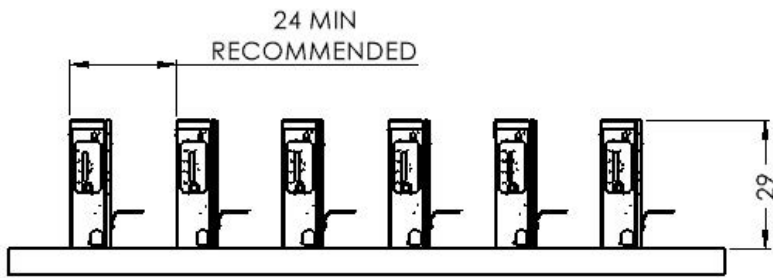

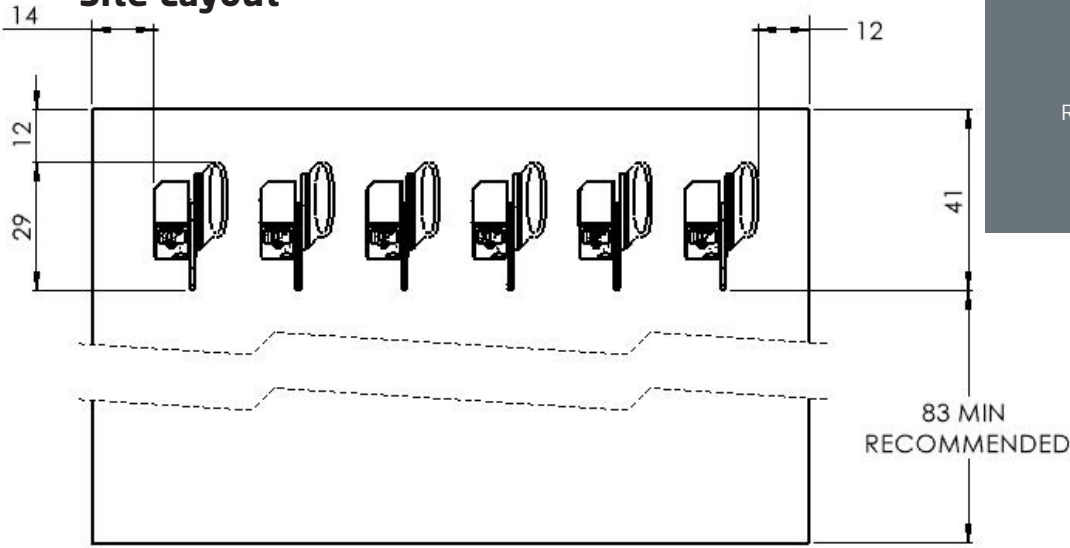

Our eBike Charging Station is a public-use, universal eBike battery charging system that also provides a secure means of parking your bike. Designed to accommodate a wide range of personal eBike drive systems, each "charging dock" has a secure, user-accessible locker that contains a 120V/240V outlet for power access. Using their personal charger, users can safely store the charger inside the locker during charging.

Product Specifications

- Available in worldwide power options 120V/240V; designed to be hardwired
- All units equipped with GFCI outlets
- Charging box door secured with padlock
- Active cooling system to prevent charger from overheating
- Can be installed indoors or outdoors with overhead protection
- User instructions on each unit
- Optional wheel tray accessory can accommodate up to 5" fat tires
- All electronic components UL/CE listed
